

eChallenges e-2013 Final Programme

Dublin - *Ireland*

09 - 11 October 2013

Supported by

Introduction

The **eChallenges e-2013** Conference takes place 09 - 11 October in Malahide, County Dublin, Ireland. This is the twenty-third in a series of annual technology research conferences supported by the European Commission. **eChallenges** brings together senior representatives from leading public, private, education and research organisations around the world to share knowledge, experience, lessons learnt and good practice.

Thematic areas addressed during the Conference include Cloud Computing; Smart Cities & Smart Grid; eGovernment; eHealth; eInclusion; Living Labs; Intelligent Content; Networked, Smart & Virtual Organisations; Digital Preservation & Digital Libraries; International Cooperation and Technology Enhanced Learning.

The reputation of the **eChallenges** Conference Series is based on its international perspective and its focus on high quality papers, discussion and networking. Opening and closing plenary sessions will focus on Horizon 2020. Thematically focused parallel sessions provide coherence to a programme featuring an invigorating mix of business and government case studies, technical and policy papers and participatory workshops.

The Community Building goals of **eChallenges e-2013** are to facilitate international research cooperation and successful exploitation of research results and showcase host country achievements, to promote knowledge sharing between commercial, government and research organisations, to share experiences about the current state of global eAdoption at sectoral, national and regional levels, to identify new partners for proposals to be submitted under Horizon 2020, to support International Cooperation and open up the European Research Area to the rest of the world.

Who will you meet at e-2013?

The **eChallenges** Conference Series attracts policy makers, practitioners and researchers from leading commercial, government and research organisations around the world. Participants include Ministers, Director-Generals, policy makers, senior & middle managers, professors & graduate students, project managers, software engineers and researchers.

eChallenges e-2013 provides a prestigious international forum to increase awareness of exploitable ICT research results and applications, whether funded privately or publicly.

The **eChallenges** Community is open, inclusive and welcoming, providing an excellent networking environment to discuss problems and new ideas, share knowledge and experience, and obtain feedback from potential users.

The **eChallenges** Conference Series also provides a unique opportunity to identify partners and opportunities to cooperate in international research projects co-funded by the European Commission under Horizon 2020 which starts in 2014.

The Venue

eChallenges e-2013 Conference takes place at the Grand Hotel, Malahide, County Dublin, Ireland.

The Programme

The 3-day Conference Programme combines strategic keynote presentations related to Horizon 2020, technical papers, business and government case studies and interactive workshop sessions.

The Opening Plenary on Wednesday morning is dedicated to sharing insights into Horizon 2020. The

Closing Plenary on Friday includes a panel discussion on Experiences in FP7 and Strategies for Horizon 2020. Take this opportunity to learn about Horizon 2020 and meet new partners for collaboration.

As well as opening and closing Plenary Sessions, delegates may participate in over 26 thematically focused parallel sessions featuring different aspects of Cloud Computing; eGovernment; eHealth; Smart Grid & Smart Cities; Living Labs; Intelligent Content and Semantics; Networked, Smart and Virtual Organisations; International Cooperation and Technology Enhanced Learning. Session Chairs will ensure active discussion and facilitate delegate participation and networking with other participants.

The Conference Programme is subject to change, and the **eChallenges e-2013** Organising Committee reserves the right to alter the contents, venue and/or speakers. Please check the Conference Portal regularly for the most up to date Online Programme.

Networking Support

Networking is a key feature of the **eChallenges** Conference Series, and is facilitated in a number of practical ways. Paper and workshop sessions are designed to maximise knowledge sharing by providing time for interactive discussions during the Conference Programme itself.

A number of dedicated networking areas are provided at the venue to facilitate spontaneous meetings by small groups. Finally, the **Delegate Showcase** on the **eChallenges** portal (www.eChallenges.org) allows registered delegates and presenters to publish personalised profiles to facilitate networking before, during and after the Conference.

Security, Health and Safety

Please wear your name badge for all **eChallenges e-2013** activities, as it is your identification and allows you access to all Conference facilities. Unfortunately, conferences can provide a tempting target for thieves, so please take particular care of laptops, tablets, smart phones and other belongings.

The Organisers cannot accept any responsibility for losses incurred, or for personal health and safety. Delegates should ensure they have personal health insurance and take the usual care when exploring Malahide and the City of Dublin. If you have any special needs or requirements, please contact the Conference Secretariat well in advance of the event.

Hotel Accommodation

The Conference Organisers have negotiated special rates at the Conference venue (**Grand Hotel**), which is in the heart of Malahide Village, County Dublin.

Please note that Malahide is 30 minutes travel time by DART light rail from Dublin. It is also possible to travel by bus but this takes more time. By staying in the Conference Hotel, you will maximise networking opportunities with other conference participants.

eChallenges e-2013 delegates are strongly recommended to book their accommodation online early, as Dublin is busy the week the Conference takes place. While the Conference Organisers will try to accommodate delegates, rooms in the Grand Hotel will be allocated on a first-come, first-served basis.

The most up to date information in relation to hotel room availability is available on the **eChallenges** Portal (www.eChallenges.org).

Malahide

Malahide is a pretty heritage village founded in the 12th century and located by the sea, 16 kms north of Dublin City. It is located close to the M50 and Dublin airport with good rail and bus links.

Local places to visit include Malahide Castle and Gardens, Avoca Shop and Café, Malahide Marina. There are also a good mix of restaurants and pubs close to the Grand Hotel.

Transport

It is possible to get either a taxi (c €15 and 20 mins) or Bus 102 (cheaper but with a longer transit time) from Dublin Airport to Malahide.

From Dublin City Centre, it is convenient to use the DART light rail system to get to Malahide Village.

Horizon 2020

Horizon 2020 will commence in January 2014 as the new Framework Programme to implement the Innovation Union with research and innovation funds of €80 billion from 2014 - 2020.

Horizon 2020 will address all research and innovation funding that was previously provided through the Framework Programmes for Research and Technical Development (e.g. FP7), Competitiveness and Innovation Programme (CIP) and European Institute of Innovation and Technology.

Key pillars include:

Excellent Science

Competitive Industries

Societal Challenges

It is envisaged that ICT Research and Innovation will be incorporated across all three pillars.
